

Image Source Now Offering HexaLock CD-RX Media, The First Truly Copy Protectable CD-R

Now, virtually any content type distributed on CD-R can be protected from illegal copying and use.

Basking Ridge, NJ and Bellingham, MA, May 25, 2005 – **Hexalock, Ltd.**, a leader in CD copy protection technology and digital rights management solutions announced today that, **Image Source**, a leading provider of optical equipment and media turnkey solutions, has become an Authorized Reseller of HexaLock CD-RX Copy Protection technology. HexaLock CD-RX media is the first truly copy protectable CD-R available in the market.

“We are pleased to be able to offer HexaLock CD-RX Copy Protection Solutions to our customers,” said Richard Langlois, VP Business Development, Image Source, Inc. “Not only does it provide world class copy protection, it was specifically designed to be easily integrated into our customer’s titles and automatically duplicated within Image Source’s CD-R duplication systems.” Mr. Langlois continued, “Software developers, specialty publishers, government and military service providers and virtually anyone wishing to copy protect their Intellectual Property, are ideal candidates for CD-RX use. Image Source’s HexaLock CD-RX Copy protection service will add an important, new capability for our clients to utilize.”

“The addition of Image Source as Authorized Reseller of HexaLock CD-RX copy protection solutions extends the availability of this technology, in particular throughout the Northeastern United States,” said John Stevens, Vice President, Business Development, HexaLock, Ltd. “Intellectual Property protection is an important consideration for every content owner and publishers now have a valuable additional source of HexaLock protected CD-RX media and technology for their CD-R distribution run requirements. Image Source’s extensive experience; attention to detail and exceptional project management makes them an ideal partner to offer HexaLock CD-RX Copy Protection solutions.”

About Image Source

Image Source, Inc. is privately held software manufacturing service provider located in Bellingham Massachusetts. Founded in 1992 Image Source began as the northeast regional Reseller of Rimage™ CD-R duplication equipment. Today Image Source is a dedicated, performance-oriented software manufacturing Service Company working with major software and hardware OEM’s across the country providing reliable, cost-effective CD duplication and fulfillment solutions.
