

**Bellingham, MA, April 3, 2006, 2006 -Image Source**, a leading Re-seller of Rimage CD/DVD duplication equipment, announced today the availability of the Rimage family of Producer III disc publishing systems - the industry's highest performing, most reliable solutions for automatically creating large volumes of professional CDs and DVDs with customized digital content and labels.

**Producer III**

In addition to utilizing the best in robotics and direct-to-disc print technologies, the Producer 7100 and 8100 incorporate new, high-performance hardware and software for faster disc production, as well as advanced monitoring tools for at-a-glance job status and proactive alerts for replenishing disc and print ribbon supplies. The result is a networked, self-sustaining solution enterprises can depend on for 24/7 reliability.

As the world leader in disc publishing, Rimage is the only company providing high-performance systems that meet the quality, quantity and customization requirements of critical publishing applications. The Producer III is a relentless system for producing professional quality CDs and DVDs - disc after disc. With enhanced job monitoring, speed and system status capabilities, Producer III delivers unmatched performance and reliability."

#### **Additional Producer III Features**

- New automatic printer and disc tracking for immediate job status feedback
- New Firewire 800 for accelerated DVD/CD burning
- New software features that enhance system throughput and reliability
- New internal illumination for easy viewing of discs
- Everest thermal retransfer printing for permanent direct-to-disc labeling
- Up to four pre-aligned CD/DVD recorders
- 300 disc multiple bin capacity allowing for multiple media types
- High-end industrial design

The Producer III is available through Image Source, Inc. a Rimage value added reseller (VARs) since 1996. Image Source provides field support for Rimage disc publishing

systems, including a full line of consumables, and maintenance options designed to maximize the quality of its systems and fit each customer's unique needs.

### **About Image Source**

Image Source, Inc. Founded in 1992 is privately held service provider located in Bellingham Massachusetts. Image Source provides a growing list of hardware, software and services all designed for capturing and distributing information. As an authorized reseller for Rimage Corporation, Kofax and Fujitsu, Image Source sells, installs and service's a complete line of CD/DVD duplication and printing systems, scanners and data capture software all designed to provide tailored content management solution.

The company works with a broad range of the industries from emerging technology and information companies, to colleges, legal firms, financial institutions and medical practices. These companies require the capture of critical business information from disparate forms such as paper, electronic forms and e-mail documents and consolidated into a rapid access, searchable and retrievable database.
